PROFESSIONAL SUMMARY

Software Engineer with full-stack experience in building scalable web applications. Experienced in React, TypeScript, Node.js, and FastAPI, with a strong focus on backend development and system reliability. Skilled in debugging, system maintenance, and delivering features based on business requirements. Currently pursuing a master's degree in computer science.

EXPERIENCE

Software Engineer (Node.js)
Solid Studio *January 2026 - Present*

- Maintained and enhanced a production e-mobility platform used by international clients by resolving cross-stack issues (React frontend and backend services), improving system stability
- Collaborated directly with clients to gather requirements and troubleshoot technical issues, handling 10+ support cases weekly
- Applied domain expertise in e-mobility protocols (OCPI, OCPP)
- Monitored system performance and responded to incidents using AWS CloudWatch.
- Contributed to the development of an AI-based tool for automating ticket analysis and handling
- Worked in a cross-functional agile team, participating in code reviews, sprint planning, and deployments

Tutor
Edualy *September 2021 - Present*

- Delivered 1:1 tutoring in CS, math, and physics to 50+ students, improving exam performance
- Explained technical topics (algorithms, data structures, web technologies) in a clear and accessible way
- Customized lesson plans to individual learning needs, improving engagement and outcomes

Junior Software Engineer
Codibly *February 2019 - May 2019 (Internship) | March 2024 - January 2026*

- Designed and implemented frontend and backend features for e-mobility and renewable energy systems using React and Spring Boot, contributing to production-ready solutions
- Developed and maintained production web applications, extending existing modules and ensuring system reliability
- Collaborated with clients and cross-functional teams, presenting progress and proposing functional and UX improvements to stakeholders
- Performed testing activities, including unit testing (Jest), manual testing, and performance testing using JMeter, identifying and resolving critical issues
- Participated in Agile/Scrum processes (code reviews, sprint planning, daily stand-ups), ensuring timely and high-quality feature delivery

CERTIFICATIONS

- EE.08 – Installation and Operation of Computer Systems, Peripheral Devices, and Networks
- EE.09 – Programming, Creation and Administration of Websites and Databases
- Google Associate Cloud Engineer & Google Data Analytics Professional Certificates
- Google UX Design Professional Certificate (in progress)

EDUCATION

Master's degree in Computer Science
Jagiellonian University • October 2024 – present
- ***Master's thesis****: Developing an exploratory interface for cultural heritage using knowledge graphs and XAI*

Bachelor's degree in Applied Computer Science
Jagiellonian University • October 2021 – June 2024

IT Specialist
Upper Secondary School of Communications in Cracow • September 2017 – May 2021
- *Volunteered teaching programming fundamentals to diverse student groups, designing and delivering individual projects*

SKILLS

Programming Languages: JavaScript • TypeScript • Python • Java
Frontend: React • React Native • Vue.js • HTML5 • CSS3 • Material UI • Three.js
Backend: Node.js • NestJS • FastAPI • Spring Boot • REST APIs • WebSockets
Databases: MySQL • PostgreSQL • Neo4j
Testing & DevOps: Docker • AWS • CI/CD • Jest • Vitest • JMeter
Tools: Git • Figma • JetBrains • Photoshop • MS Office
Languages: Polish (Native) • English (C1)
Soft Skills: Communication • Client Collaboration • Problem-Solving • Mentoring

I hereby consent to the processing of my personal data for the purpose of recruitment and consideration of my application for current and future job opportunities
